SUMMARY

Full-stack Developer with a diploma in Software Development and real-world experience building cloud-native applications, UI components, and secure authentication systems. Strong focus on clean architecture, DevOps practices, and scalable front-end code. Skilled in React, Spring Boot, Java, JavaScript, AWS, and Docker. Passionate about working in fast-paced, meaningful projects with a commitment to ongoing learning and real-world deployment experience.

EDUCATION

Keyin College — Diploma in Software Development

Graduated: April 2025

Relevant Courses: Full-Stack Development, Cloud Computing, DevOps, Data Structures, Algorithms

CERTIFICATIONS

- Coursera Certificate in Data Science — April 2023

SKILLS

Languages:

Python, Java, JavaScript, HTML, CSS

Frameworks & Libraries:

React.js, Node.js, Express.js, Spring Boot, Ionic

Cloud & DevOps:

AWS (EC2, S3, Cognito, Lambda, RDS), Docker, GitHub Actions

Databases:

MongoDB, MySQL, PostgreSQL

Tools & Platforms:

Git, GitHub, Postman, Figma, IntelliJ, VS Code

EXPERIENCE

Software Development Intern

Invert (Tech Startup) • Feb 2025 – Mar 2025

- Built and styled front-end features using the Ionic framework for mobile-first views.
- Collaborated with a fast-moving team to deliver clean, well-tested features under tight deadlines.
- Contributed directly to production UI workflows and iterative design improvements.

PROJECTS

Concert Management System — Full-Stack Production Deployment

A full-stack SaaS-style platform to register users, manage artists, venues, and events, with JWT-based authentication and AWS deployment.

Stack: Java, Spring Boot, React.js, MySQL, Docker, GitHub Actions, AWS EC2/S3/Elastic Beanstalk

Gary Blue's Chicken Restaurant — React Migration

Migrated a static restaurant site to React with dynamic menu/cart functionality and responsive checkout.

Stack: React.js, JSX, CSS, async functions

Console-Based E-Commerce Platform

CLI application supporting Buyers, Sellers, and Admins, with secure login and PostgreSQL persistence.

Stack: Java, JDBC, PostgreSQL, BCrypt, MVC

Real-Time Voting App

Live poll app with vote tracking and WebSocket updates.

Stack: Node.js, Express.js, MongoDB, WebSockets, EJS

LANGUAGES & INTERESTS

Fluent in English

Interests: Game Development, UX Design, DevOps Engineering, Creative Coding, Cybersecurity
